DETAILED ACTION

1. This action is in response to applicant's appeal brief filed on November 2, 2005. Claims 1-49 are still pending in the present application.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 5, 19, and 49 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 11 and 99 of U.S. Patent No. 6,343,290 in view of U.S. Patent No. 6,625,132 B1 (Boettger et al).

Referring to claims 1, 5, 19 and 49, all elements of claims 1, 5, 19 and 49 are disclosed in claims 11 and 99 of U.S. Patent No. 6,343,290.

However, U.S. Patent No. 6,343,290 does not specifically disclose the element "sectored" as in **sectored** performance and **sectored** performance characteristics.

Boettger discloses sectored performance and sectored performance characteristics (abstract, figure 1, and col. 2, lines 20-30, col. 3, lines 11-124, col. 4, lines 41-44, col. 4, lines 55-57, col. 5, lines 10-17, col. 5, lines 25-34, "subscribers in the Dead Zone see on the mobile station display that the CDMA system is available, their perception is poor system performance", "plurality of sectors", note that Dead Zones are sectors of the communication zones identified according to their performance characteristics).

It would have been obvious to one of the ordinary skill in the art at the time of invention to modify claims 11 and 99 of U.S. Patent No. 6,343,290 by incorporating the teachings of Boettger by providing sectorization to communication zones of U.S. Patent No. 6,343,290 according to their performance characteristics (e.g., identifying Dead Zones for having poor communications performance), for the purpose of efficient management of the communication network and improving communication quality by identifying the sectors associated with poor performance.
